- Force-open alarm
- Emergency power terminal of 9V battery
- Theft & Prank prevention (1 minute stoppage after 5 straight wrong input)
- Auto Card Detection

Key Features of Loghome LH-300GLC:

Basic Functions:

- ✓ **Open/Close button:** manual opening/closing in case of fire or other emergencies
- ✓ **Automatic/Manual Locking:** can choose between automatic or manual locking of bolt once the door is closed. For automatic locking, time to lock can be changed from 2 to 9 seconds
- ✓ **External Dual Locking Function:** door does not open in spite of pressing the open/close button from the indoor
- ✓ **Inside Dual Locking Function:** door does not open even though a valid password from outside is entered
- ✓ **Emergency Power Supply:** when a unit has zero battery, can use 9V Square battery to jump-start unit and enter using registered Pin code/RFID
- ✓ **Master Number Function:** registered pin/RFID in this mode cannot be altered without knowing the master number, usually used for dormitories
- ✓ **Reset Function:** bypass to the 1-minute shutdown of the system after 5 incorrect attempts

- ✓ **Locking Error Alert:** generates an error tone when the door is not properly closed
- ✓ **Sound Volume:** adjust the sound volume of tones

### Safety Functions:

- ✓ **Fake Number Function:** hide your true Pin code by pressing random numbers before your real Pin code
- ✓ **Multiple attempt shutdown:** after failure to input valid password in 5th attempt, the operation will not be available for 1 minute
- ✓ **Intrusion and Prank Prevention Function:** generates an emergency alarm for 1 minute when there is an attempt to open a door by force
- ✓ **Fire Detection:** when an indoor sensor of door lock detects fire, it automatically opens the door for safety
